

Knowledge

LS Lowry 1887-1976

He was one of the most famous artists from the mid 20th century. He is famous for painting industrial landscapes and matchstick figures. Lowry lived and worked in the north west of England.

Perspective

In drawing and painting, perspective is a way of making the picture 3D. By making far away objects smaller and nearby objects bigger, it creates a feeling of space. It shows that objects appear smaller the further away they are.
